

On behalf of all of us at Elevate Dental Wellness, we welcome you to our office. We understand that choosing a new dentist and a new dental team can be a challenge, that's why we're honored you have chosen us to care for you and your oral health. We look forward to getting to know you at your first visit, and we believe that dental care will have a new and pleasant meaning for you after visiting our practice.

Our mission is to help you achieve the highest state of health and help enhance the quality of your life.

We are committed to providing you the help you need **to become as healthy as you choose**. We pride ourselves in being a total health and wellness centered dental practice, a practice that considers you as a total person and not just a mouth with teeth! Additionally, instead of telling you what's wrong with you, and how to "fix" you we try to help you understand the causes of oral diseases, and the choices you have in creating long lasting oral health. When given proper information in a supportive environment, you can then make a free and informed choice about what you want for your health.

While our emphasis is on early preventative care, we also provide restorative care, including full mouth rehabilitation, emergency dental treatment, and a full spectrum of other dental services to meet all your oral health needs. The goal of good dentistry is to help you keep your teeth for the rest of your life in maximum health, comfort, function and esthetics at minimal stress and expense to you. We are committed to making that a reality for every patient that enters our office. In our practice, you are a person of great value and importance. Your physical, mental, and emotional health will be our prime concern.

We would like to tell you what you can expect on your first visit to our office as it may be a little different than what you are used to. You are uniquely you, and it is important for us to have as much information about you before we begin taking care of your oral health. During your first visit, a comprehensive examination with either Dr. Becky Steinbach or Dr. Schuyler Van Gorden will be completed. This exam will include a complete review of your medical and dental histories, necessary x-rays, thorough examination of your mouth, teeth, gum tissues and supporting structures, an occlusal examination, and oral cancer screening. This examination allows us to properly diagnose the condition of your mouth which allows us to come up with a customized preventative and (if necessary) restorative treatment plan for you. After we have discussed your treatment plan we will then schedule your initial preventative (cleaning) appointment.

Should you have any questions about our practice, services, or policies please do not hesitate to contact our office or visit our website at elevatewillits.com. Our door is always open to you for your dental needs, please let us know how we can help you feel at home in our office.

We look forward to not only a long-term professional relationship, but a lasting friendship as well.

Thank you, and see you soon,

Drs. Becky Steinbach and Schuyler Van Gorden
